

GRP TANK above BOOSTER SET

[For guidance purposes only]

GRP water tanks moulded in one or two-piece construction with option for central divide where required.

All tanks comply with Water Supply Regulations 1999 (Fluid category 5) and incorporate a Type "AB" air gap.

Box section frame construction fully supports the tank over the entire base area.

Features:

- Tanks up to 3000 litre capacity can be mounted over booster pumps
- Solid box section assembly allows us to build in kit-form to suit restricted conditions
- Tanks are pre-insulated with 25mm CFC-free foam; other insulation values available

Other Products in our Range include:

- Calorifiers
- Plate Heat Exchangers
- Thermal Storage Vessels

Our company's policy is to continue to develop and improve our equipment; we reserve the right to make any changes to this specification without prior notice
